1 Introduction to BatteryPro Software

Introduction	1-2
Intended Use	1-2
Features	1-2
Purpose	1-3
Intended Audience	1-3
Illustrations	1-3
Revision History	1-4

Introduction

Intended Use

This document provides installation and operating instructions of BatteryPro V3.6.12.0 Mobile Computing Workstation Power Supply Management Software. This software monitors the status of the Power Supply and its condition.

BatteryPro V3.6.12.0 Software is compatible with the following power supply and battery models:

- MPE-7800 (NiMH)
- MPS-4007 (Li-Nano)
- MPS-4009 (Li-Nano, LiFe, SLA)
- MPS-4010 (Li-Nano, LiFe, SLA)

Anton Bauer (Swappable Mount on the 1770 cart and earlier models with following Batteries)

- Dionic 160, Dionic HD
- Dionic HCX 120
- Elora

NOTE

BatteryPro V3.6.12.0 is not compatible with the Anton Bauer Elora Interface on the AccessPoint cart.

Features

1. Displays vital information of the power system like:
 - ◆ Charge level
 - ◆ Remaining charge time or remaining run time
2. Status information of the power system like:
 - ◆ Battery chemistry and rating
 - ◆ Power state
 - ◆ Output voltages
 - ◆ RF signal strength of the on-board computer
 - ◆ Battery health
 - ◆ Firmware version and serial number information
3. Setting alarms and alarm actions.
4. Fan/fan less and output voltage configuration.
5. Compatible with Monitor Fleet Manager software of the same version number.

Purpose

TouchPoint™ Medical has prepared this manual to provide installation and operating instructions for BatteryPro software application.

Intended Audience

The intended audience of this manual includes clinical and IT professionals involved in sustaining maximum performance of their point-of-care computing technology.

IT professionals should be aware of facility policies as well as current computer and system technologies.

As primary users of this software, nurses and clinical professionals should have a working knowledge of the facility procedures, terminology and the practices involved in performing actions with this software application.

Illustrations

All illustrations in this manual are provided as examples only. Screens shown in this manual do not necessarily reflect or emulate your exact patient data or the precise appearance of your screen.

In this manual, all names appearing in examples and illustrations are fictitious. The use of any real person's name is purely coincidental.

Conventions

This manual is written with certain conventions designed to make the information understandable and readable. Please familiarize yourself with the following:

- Items in **Bold** text are buttons or switches on the equipment, keyboard keys, or text to be entered.
- *Italicized* items are buttons, labels, options or other fields within the software application.
- References to **Enter** require pressing the **Enter** or **Return** key on the keyboard. Do not type the word enter.
- A keystroke combination is displayed as two key names with a plus sign between them. It requires holding down one key while pressing another key on the keyboard. For example, Press **Ctrl + Enter** means hold the **Ctrl** key while pressing the **Enter** key.
- References to the spacebar appear as **<Space>**. The brackets remind you to press the spacebar. Do not type the word space.

Revision History

Each page of the original manual shipped with your system has a revision letter on it. As the document is updated, the revision letter is changed.

Revision	Date	Comments
A	06/30/2015	Initial Release
B	11/02/2015	1) Removed reference "Emerson" from entire manual. 2) Added reference of section "Configurable Selectable Voltages" in Chapter 3. 3) Added BlueCHIP Integration in Page 3-14.
C	11/16/2016	Rebranded

2 Installation of BatteryPro Software

Software Installation	2-2
Prerequisites	2-2
Extracting the BatteryPro Package Files	2-2
Application Installation	2-3
Uninstall BatteryPro	2-5

Software Installation

The BatteryPro software application installation file contains all drivers and applications for BatteryPro operation.

NOTICE

For any problems with application installation or settings, please first consult your IT department before contacting TouchPoint™ Medical Customer Service.

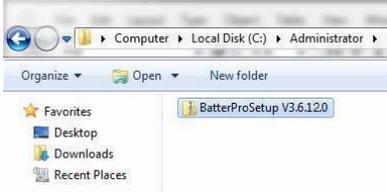

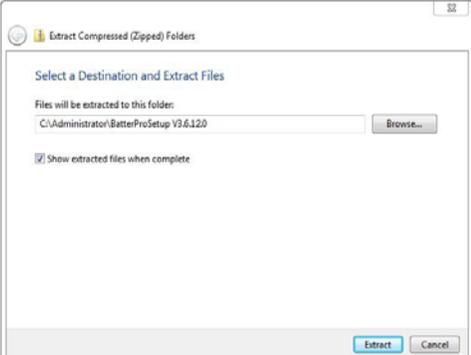

Prerequisites

- Windows XP service pack 2 or Windows XP service pack 3
- Windows 7 32-bit
- Windows embedded standard 7 32-bit
- Windows XP embedded 32-bit
- Windows embedded standard 2009 32-bit
- Windows 7 64-bit
- Windows embedded standard 7 64-bit
- Windows 10 Professional 64-bit
- Windows 10 Enterprise CBB 64-bit

Extracting the BatteryPro Package Files

If BlueCHIP Integration was purchased, your workstations arrives on site with BatteryPro installed. If BlueCHIP Integration was not purchased, please contact Customer Service for BatteryPro Software Package.

The BatteryPro software and the electronic version of this manual are packaged in the file *BatteryPro V3.6.12.0.zip*.

 <p>001A</p>	<p>Extract BatteryPro Files</p> <ul style="list-style-type: none"> ■ Click "Browse" button to set a different location to save the files. ■ Click on check box "Show extracted files when complete" to set whether you want to launch the window showing the extracted files when you click the "Extract" button.
 <p>002A</p>	<p>Extract BatteryPro Files</p> <ul style="list-style-type: none"> ■ Click "Browse" button to set a different location to save the files. ■ Click on check box "Show extracted files when complete" to set whether you want to launch the window showing the extracted files when you click the "Extract" button.

Application Installation

1. After opening BatteryPro installation package, there are several items listed in the package.
2. When installing BatteryPro, double left-click on the InstallBatteryPro.bat file in the installation package.

NOTE

If an older version of BatteryPro is already installed, you must uninstall the older version first.

3. Command screen appears once the installation procedure starts.

NOTE

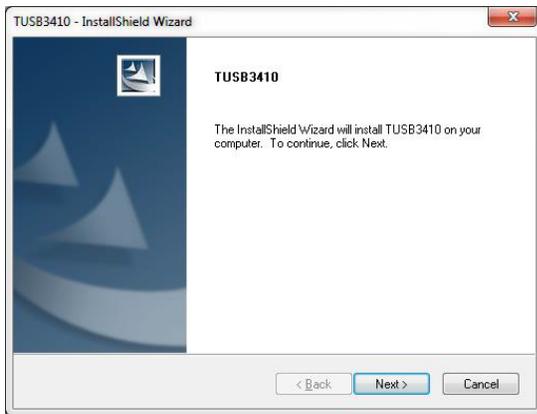

Once the installation procedure completes, the command screen disappears.

3 BatteryPro Software Instructions for Use

Starting BatteryPro	3-2
BatteryPro Settings	3-3
Stop BatteryPro	3-3
Status Indicators	3-4
Status Icon	3-4
Desktop Status Window	3-5
BatteryPro Configuration and Status	3-8
Open the BatteryPro Dialog Window	3-8
Configuration Settings	3-9
Power Meter	3-10
Alarms	3-11
Status	3-13

Starting BatteryPro

When installed, BatteryPro is typically configured to start automatically, when the host computer starts up. No additional user action is required.

NOTICE

BatteryPro requires the workstation computer to be connected via USB to the power supply USB port. The connection is already made, if the workstation is delivered with the power supply and BatteryPro installed.

If BatteryPro is not running as indicated by the status tray icon shown below, it can be started by double-clicking on the blue BatteryPro shortcut provided on the desktop by the software installation.

- Battery shape indicates BatteryPro is running (example shown is fully charged state).

011A

- If BatteryPro is not running, double-click on the desktop shortcut to start BatteryPro.

012A

NOTE

BatteryPro shortcut is also available from the Windows Start All Programs menu.

NOTICE

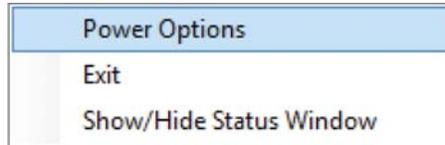

The first time BatteryPro is launched, the Windows Firewall may ask if you want to continue to block BatteryPro. If this happens, click *Unblock*.

013A

BatteryPro Settings

BatteryPro settings are configured through the BatteryPro dialog window. Enter the dialog window by right-clicking on the BatteryPro status tray icon and selecting “Power Options” with a left click.

014A

The tabs in the dialog window shown below may be selected to view and configure the BatteryPro settings. See “[BatteryPro Configuration and Status](#)” on page 3-8.

Configure Selectable Voltages

The factory default selectable voltage is 19 VDC. If your computer has a different input voltage, then the selectable voltage must be changed prior to installing your computer in the cart. See “[Change Voltage with BatteryPro](#)” on page 3-14.

Stop BatteryPro

BatteryPro can be stopped by right-clicking on the BatteryPro status tray icon and selecting *Exit* with a left click.

Status Indicators

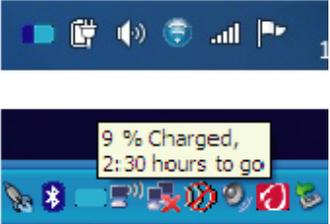

Start BatteryPro application as mentioned in “Starting BatteryPro” on page 3-2.

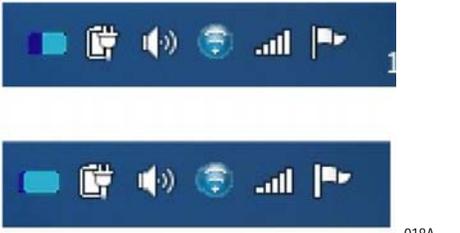

BatteryPro has two ways of showing the status of the workstation power supply. Both are shown in the lower right hand side of the computer display, in and above the status tray.

1. An icon in the status tray shows the state of the power supply batteries.
2. The Desktop Status Window that can be hidden or moved anywhere on the workstation monitor display, provides brief information of the state of the power supply batteries.

Status Icon

The Status Icon in the status tray shows the charge status of the workstation power supply batteries.

 <p style="text-align: right; font-size: small;">015A</p>	<p>Communications: Standby: Power supply and workstation computer communications interrupted.</p> <p>Symbol may appear briefly when BatteryPro has just started, while the power supply and computer establish USB communications.</p> <p>The status must change to a battery shape below: if it does not, the USB connection between the computer and power supply has a problem.</p>
 <p style="text-align: right; font-size: small;">016A</p>	<p>Charging: Power supply is plugged into AC power source and is charging the batteries.</p> <p>Placing the mouse pointer over the icon reveals the charging status: the percentage of charge in the batteries and remaining charge time to full charge.</p>

 <p>017A</p>	<p>Fully Charged or Discharging, Full Level:</p> <ol style="list-style-type: none"> 1. Power supply is plugged into AC power source and the batteries are fully charged, or 2. Power supply is not plugged into AC power source and is running on fully charged batteries. <p>Battery icon is a steady blue. Placing the mouse pointer over the icon reveals the charge status.</p>
 <p>018A</p>	<p>Discharging: Power supply is not plugged into AC power and is running on batteries. Battery icon is steady blue to the battery charge level.</p> <p>Discharging, Low Level: Power supply is not plugged into AC power and is running on batteries. Battery charge has dropped below threshold set for "Low Battery Alert" (see "Alarms" on page 3-11). Battery icon is a thin dark blue line.</p> <p>Note: A "Low Battery Alert" message may be displayed.</p>

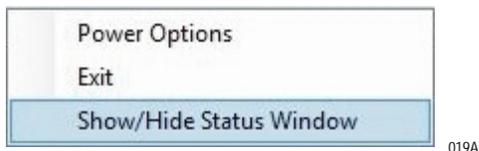

Desktop Status Window

The BatteryPro Desktop Status Window normally appears above the status tray icon. It provides descriptive information of the charge status of the workstation power supply batteries, including estimated time to complete charging or until fully discharged. The Status Window appears, if the *Always Display Battery Status* box is checked in the Scheme tab of the BatteryPro dialog window (see "BatteryPro Configuration and Status" on page 3-8).

Display the Desktop Status Window

The Desktop Status Window can be enabled in two ways:

1. Right-click on BatteryPro status tray icon and select and left click on *Show/Hide Status Window* to display the Desktop Status Window.
2. Open the BatteryPro dialog window, select the *Scheme* tab and check the *Always Display Battery Status* box (see also *Scheme* under "BatteryPro Configuration and Status" on page 3-8).
3. Right-click on BatteryPro status tray icon, select left click on *Show/Hide Status Window* to display the Desktop Status Window.

Move the Desktop Status Window

You can move the Desktop Status Window by clicking on it and holding down the left mouse button, and then dragging it to any part of the monitor display.

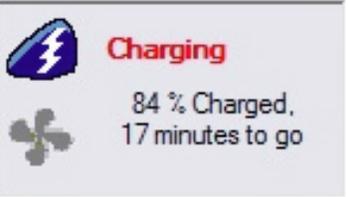

Hide the Desktop Status Window

You can hide the Desktop Status Window (disabled from display) in two ways.

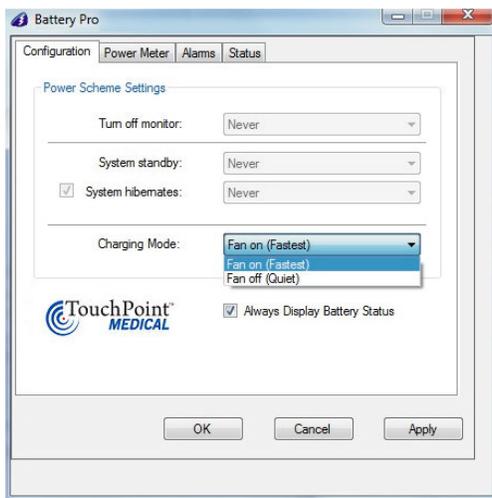

1. Open the BatteryPro dialog window, select the *Scheme* tab and clear the *Always Display Battery Status* box (see also *Scheme* under “**BatteryPro Configuration and Status**” on page 3-8).
2. Show/Hide status window.

Desktop Status Window Indicators

Following are the indications of the Desktop Status Window:

 <p>Communications: Standby</p> <p>020A</p>	<p>Communications: Standby: Power supply and workstation computer communications interrupted.</p> <p>Symbol may appear briefly when BatteryPro has just started while the power supply and the computer establishes USB communications. The status must change to the next state below. If it does not, the USB connection between the computer and power supply has a problem.</p>
 <p>Charging</p> <p>84 % Charged, 17 minutes to go</p> <p>021A</p>	<p>Charging: Power supply is plugged into AC power source and is charging the batteries.</p> <p>The battery icon in light/dark blue indicates the battery charge level. The desktop status window displays the charge level in percent and the calculated remaining runtime.</p>
 <p>Charged</p> <p>100 % Charged</p> <p>022A</p>	<p>Charged: Power supply is plugged into AC power source and the batteries are fully charged.</p> <p>Battery icon is a steady blue.</p>
 <p>Discharging</p> <p>71 % remaining 8:18 hours to go</p> <p>023A</p>	<p>Discharging: Power supply is not plugged into AC power and is running on batteries.</p> <p>Battery icon is steady blue indicating the battery charge level.</p> <p>The desktop status window displays the battery charge level in percent and the calculated remaining runtime.</p>

 <p>024A</p>	<p>Discharging, Low Level: Power supply is not plugged into AC power and is running on batteries.</p> <p>Battery charge has dropped below threshold set for “Low Battery Alert” (see “Alarms” on page 3-11). The battery icon in light/dark blue indicates the battery charge level.</p>
 <p>025A</p>	<p>Notice: A “Critical Battery Alert” message may be displayed if “Display Message” box is checked as notification action.</p> <p>See “Alarm Notification and Action Settings” on page 3-11.</p>

For fan less operation select:
Charging Mode: Fan off (Quiet)

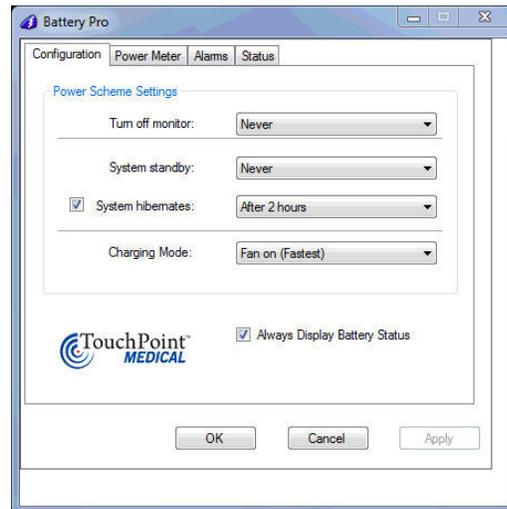

For fan operation select:
Charging Mode: Fan on (Fastest)

BatteryPro Configuration and Status

BatteryPro settings are configured through the BatteryPro dialog window. The BatteryPro dialog window also displays more detailed status and diagnostic information. The tabs in the dialog box may be selected to configure and view the various BatteryPro settings and status.

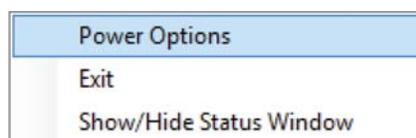

029A

- Configuration: Displays and allows changes to BatteryPro Power Scheme settings and to reveal or hide the display of the Desktop Status Window.
- Power Meter: Displays the current summary information about the power source and batteries.
- Alarms: Displays and allows changes to low and critical battery alert levels and actions settings.
- Status: Displays RF signal strength, Battery Health and BatteryPro Version.
- Diagnostic: Hidden tab: when revealed, displays power supply and individual battery data for troubleshooting purposes.
- Fault Warning: Hidden tab: when revealed, displays fault warning message.

Open the BatteryPro Dialog Window

The dialog window opens by right-clicking on the BatteryPro status tray icon and selecting *Power Options* with a left click.

014A

Configuration Settings

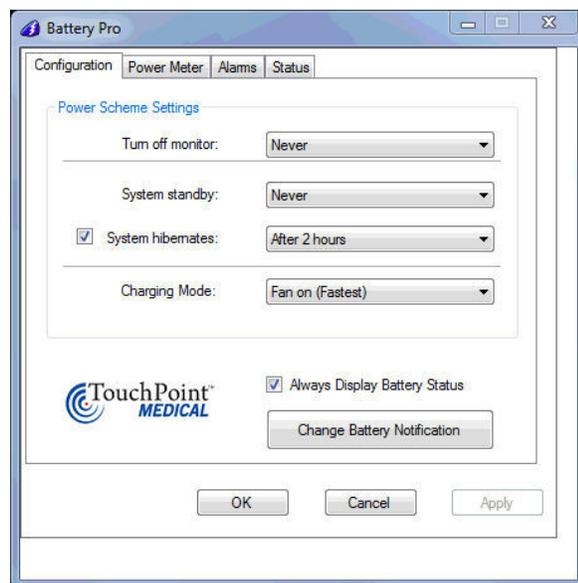

1. On the Configuration tab in BatteryPro dialog window, set the following:
 - ◆ Power Scheme Settings.
 - ◆ Always Display Battery Status.
2. Click *Apply* to apply new values.
3. Click *X* to minimize the dialog back to the status tray icon.
4. Click on another tab to view or edit other settings.

The Configuration Setting sets three delays when the workstation is not actively being used:

- *Turn off monitor*: delay until the system turns off the workstation display monitor.
- *System standby*: delay until the system enters standby mode.
- *System Hibernates*: delay until the computer enters hibernation.
- *Charging Mode*: turns Fan on (Fastest) or Fan off (Quiet).

Always Display Battery Status Checkbox

Check the box to always display the battery status window.

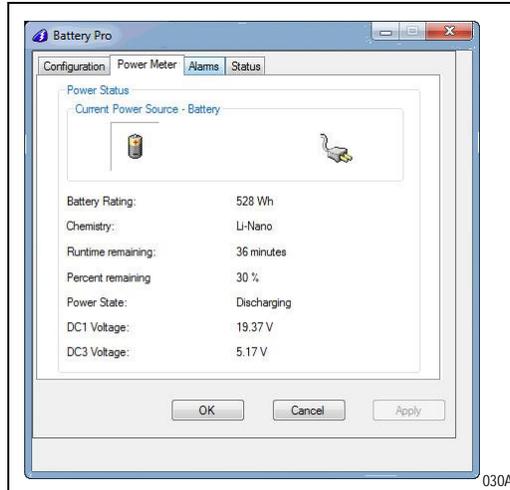

029A

Change Battery Notification

If you are using Monitor fleet management software, use the *Change Battery Notification* to notify Monitor, if batteries were changed (replaced).

Power Meter

The Power Meter tab displays the current summary information about the power source and batteries.

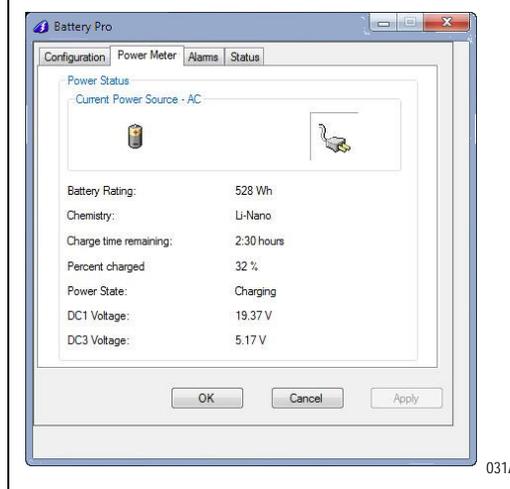

Power Meter Tab Display: On Batteries

Select "Power Meter" tab in BatteryPro dialog.

Display includes battery specifications, charge level in percent, calculated run time remaining, power state and selectable voltages if applicable.

Click on "X" to minimize the dialog back to the status tray icon.

Click on another tab to view or edit other settings.

Power Meter Tab Display: On AC

Select "Power Meter" tab in BatteryPro dialog.

Display includes battery specifications, charge level in percent, time remaining until fully charged, power state and selectable voltages if applicable.

Click on "X" to minimize the dialog back to the status tray icon.

Click on another tab to view or edit other settings.

Power Meter Tab Display: No Communication

Select "Power Meter" tab in BatteryPro dialog.

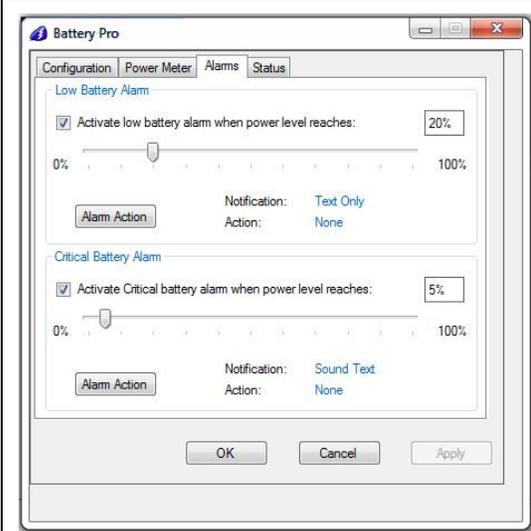

Shown at left is the blank dialog that occurs if the power supply and workstation computer communications are interrupted and the status tray icon and Desktop Status Window display "Communications: Standby."

Click on "X" to minimize the dialog back to the status tray icon.

Click on another tab to view or edit other settings

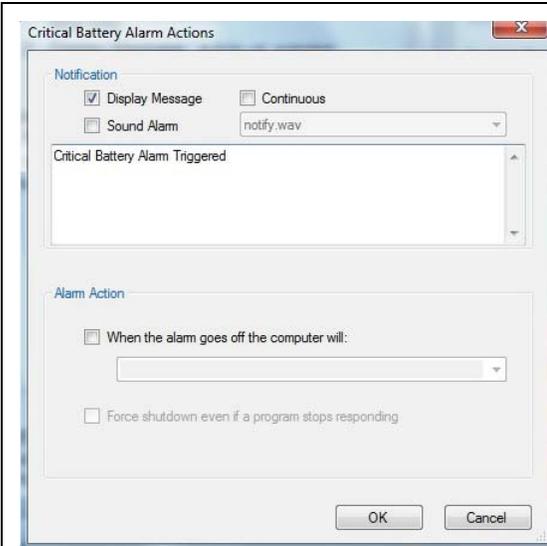

Alarms

Click on the Alarms tab to view or change low and critical battery alert levels and actions settings. Clicking on the *Alarm Action* buttons displays additional options for setting the messages and actions to be taken by BatteryPro when the alarms occur.

 <p style="text-align: right; font-size: small;">033A</p>	<p>Alarms Tab Display Select "Alarms" tab in BatteryPro dialog.</p> <p>Set Low Battery and Critical Battery Alarm threshold levels by:</p> <ol style="list-style-type: none"> 1. Click check box to activate alarm. 2. Click on and while holding down the mouse button, drag the pointer on the threshold slide bar. At the selected battery discharge level, BatteryPro will notify per text and/or sound and perform the selected action. 3. Click on "Alarm Action" button to set Alarm actions. New dialog pops up (see below). <p>Click on "Apply" button to apply new values.</p> <p>Click on "X" to minimize the dialog back to the status tray icon.</p> <p>Click on another tab to view or edit other settings.</p>
--	---

Alarm Notification and Action Settings

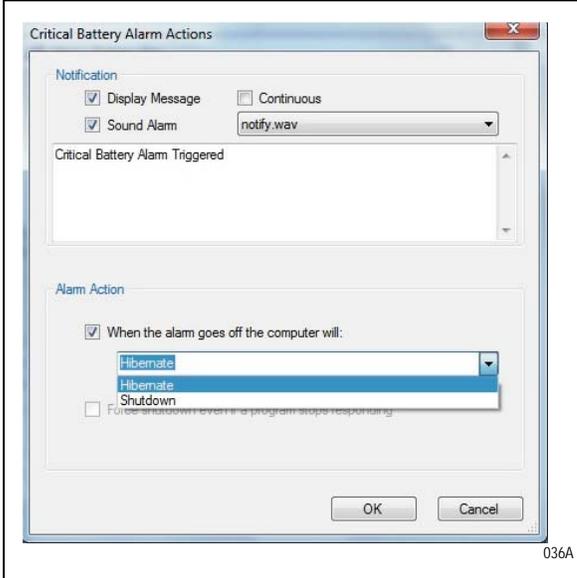

Click on "Alarm Action" button to set Alarm actions. There are separate settings for the Low Battery and Critical Battery Alarms.

 <p style="text-align: right; font-size: small;">034A</p>	<p>Notification Settings</p> <p>Click check boxes to set type of Notification desired. Two types are available in any combination:</p> <ol style="list-style-type: none"> 1. Sound Alarm: A Windows Default Critical Error sound that runs once or continuously. 2. Display Message: A pop-up warning message appears on the screen.
--	---

035A

3. Click on "OK" button to apply new value and exit the dialog.
4. Click on "Cancel" button or "X" to exit dialog without saving changes to settings.

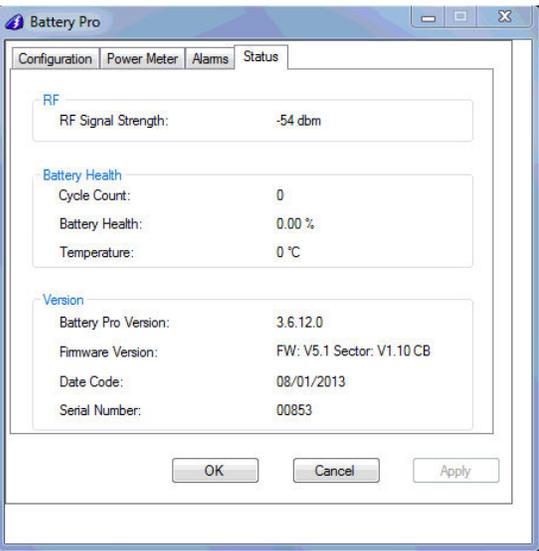

036A

Alarm Action Setting

1. Click check box to enable an Alarm action to be performed when the alarm occurs.
2. Click on down arrow at right of setting to open drop down list.
3. Click on desired action: Hibernate or Shutdown. If enabled by the Checkbox, the workstation computer performs the selected action when the alarm level is reached.
4. Click on "OK" button to apply new value and exit the dialog.
5. Click on "Cancel" button or "X" to exit dialog without saving changes to settings.

Status

	<h3>Status Tab Display</h3> <p>Select "Status" tab in BatteryPro dialog.</p> <ol style="list-style-type: none"> 1. Display includes: 2. RF information 3. Battery Health information 4. Version, date code and serial number information. <p>Click on "X" to minimize the dialog back to the status tray icon.</p> <p>Click on another tab to view or edit other settings.</p>
---	--

Diagnostic

NOTICE

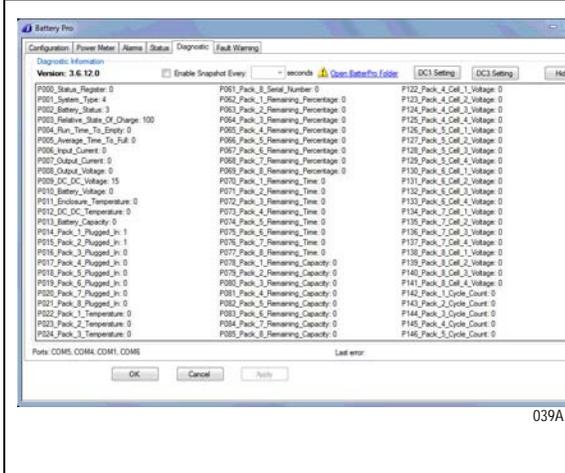

When revealed, clicking on the Diagnostic tab provides a running list of power supply and battery data for troubleshooting purposes.

The hidden BatteryPro *Diagnostic* tab is revealed by clicking on the icon in the BatteryPro dialog display.

Reveal Diagnostic Tab

Click on TouchPoint Medical icon to reveal hidden Diagnostic tab.

Diagnostic Tab

- When the Diagnostic tab opens, BatteryPro defaults to the larger window. By clicking "Hide", BatteryPro will close the Diagnostic tab and default to the smaller dialog box.
- The Diagnostic tab displays various power supply parameters that can be used for troubleshooting. A data logger (snapshot) can log data from the power supply and the power supply selectable voltages can be changed via this tab.
- Clicking "Hide" will hide the Diagnostic tab.
- Clicking "X" will minimize the dialog box back to the status tray icon.
- Click on another tab to view or edit other images.

Change Voltage with BatteryPro

NOTE

If the facility chooses BlueCHIP Integration, the AccessPoint workstation will arrive with the correct voltage setting.

NOTE

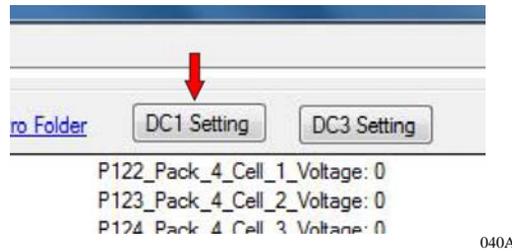

If the facility has not selected BlueCHIP Integration, follow the instructions in this section to configure the voltages of AccessPoint workstation.

The AccessPoint power supply MPS-4010 provides 3 DC output voltages.

- DC1 is selectable from 12 V to 24 V at full power (150 W average, 200 W peak)
- DC2 is fixed at 15 V when the power supply is AC powered and follows the battery voltage, when the power supply is on batteries.
- DC3 is selectable from 5 V to 10 V at a maximum current of 2 A.

The following paragraphs show how DC1 and DC3 voltages can be changed in the Diagnostic Section of BatteryPro.

1. Click on DC1 setting on Diagnostic Tab to change DC1.

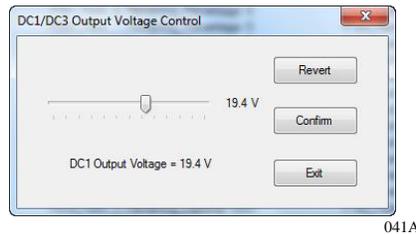

040A

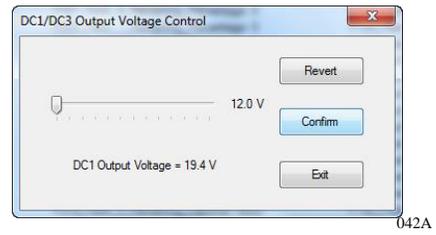

NOTE

DC1 can be changed to any voltage from 12 VDC to 24 VDC.

2. Use the slider to change the voltage. Press confirm to change the voltage.

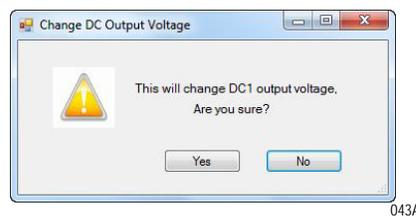

041A

042A

3. Click *Yes* on both confirmation windows to change the voltage.

043A

4. Click on DC3 setting on Diagnostic Tab to change DC3.

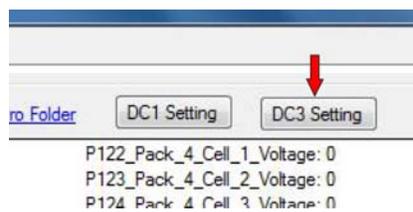

NOTE

DC3 can be changed to any voltage from 5 VDC to 10 VDC.

5. Click on DC3 setting on Diagnostic Tab to change DC3.

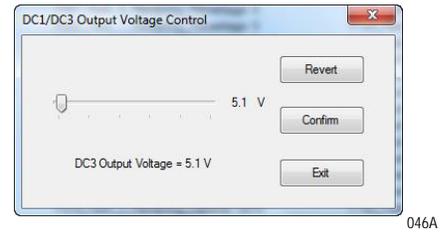

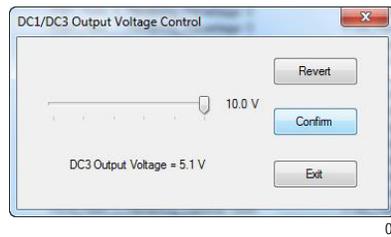

NOTE

DC3 can be changed to any voltage from 5 VDC to 10 VDC.

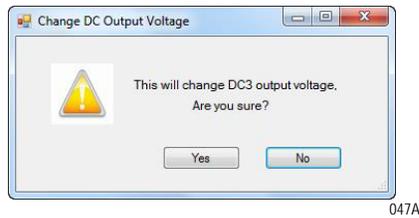

044A

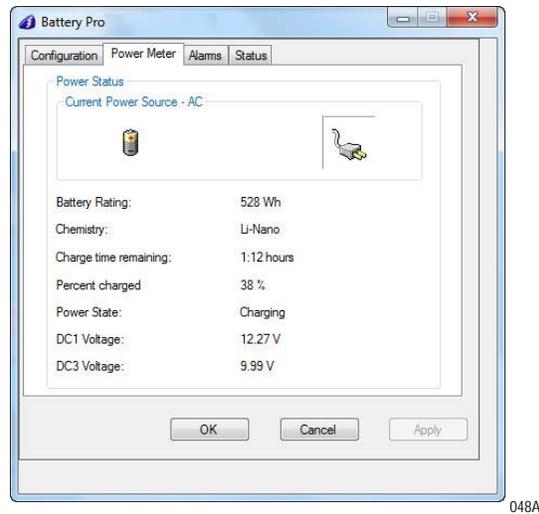

- Use the slider to change the voltage. Select *Confirm* to change the voltage.

- Click *Yes* on both confirmation windows to change the voltage.

- The power meter tab shows both selectable voltages DC1 and DC3.

Hide Diagnostic Tab

Click the *Hide* button to hide the Diagnostic tab.

Enable Snapshot Every Checkbox

Select *Enable Snapshot Every* checkbox to enable debug mode.

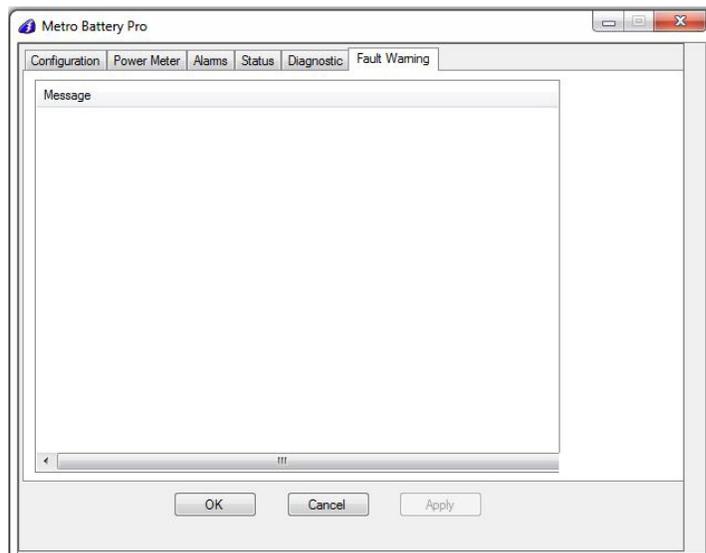

Enabling the battery data to be recorded to a log file located in the folder *C:\BatteryPro* at a time interval set by the *Interval* field.

Data Save Interval

From the drop down, choose the time, in seconds, from the Interval field for the desired time interval to save data to the log file when the debug mode is enabled.

Fault Warning

Under the Fault Warning tab, BatteryPro lists the faults in the message box that the power supply encountered during operation. These may include over/under temperature of power supply components or batteries, overload conditions or no batteries connected.
